

BATU TARMAN / RESUME

Batu TARMAN completed his BS. in Civil Engineering at Boğaziçi University after he graduated from Kadıköy Maarif College. Later on, he went abroad to further his education. He studied his master degree in Civil Engineering while working as a research assistant at Lehigh University, Bethlehem, Pennsylvania, USA.

After he received his MS. Degree, the research and studies he worked on attracted the attention of D.O.E. (Department of Energy) of USA, and he was invited to Argonne National Laboratories - a famous research and technology center which would bring many scientists and engineers together all around the world. He, than worked for Argonne in Chicago as a research engineer to further his studies for in-situ techniques and methods.

He decided to settle down in his homeland instead of working abroad, therefore he ceased his works in Argonne and moved back to Turkey in 1993.

He founded his own firm after he had worked in construction sector for two years. Until today he has completed several projects including project design and application in Turkey as well as in abroad; and now he still continues working in the construction sector.
